

BIOCH4-to-MARKET

On the Market of BioMethane as a Drop-In-Marine-BioFuel: Developing a Virtual Gas-Grid Solution

BioCH4-to-Market aims to:

- Prove the use of biomethane as marine drop-in biofuel
- Further develop novel technological solutions for biogas to biomethane upgrading
- Retrofitting a marine diesel genset to combust biomethane as a drop-in fuel
- Combustion strategies and emissions measurement and monitoring for biomethane in a marine genset
- Develop an appropriate business plan to prove feasibility of compressed biomethane in the maritime industry
- Activities to enable market access of via a virtual distribution network
